Clone a Facebook page and try to perform Desktop Phishing in your local machine and capture the credentials and write the document along with screenshots and suggest the solution to avoid from Phishing

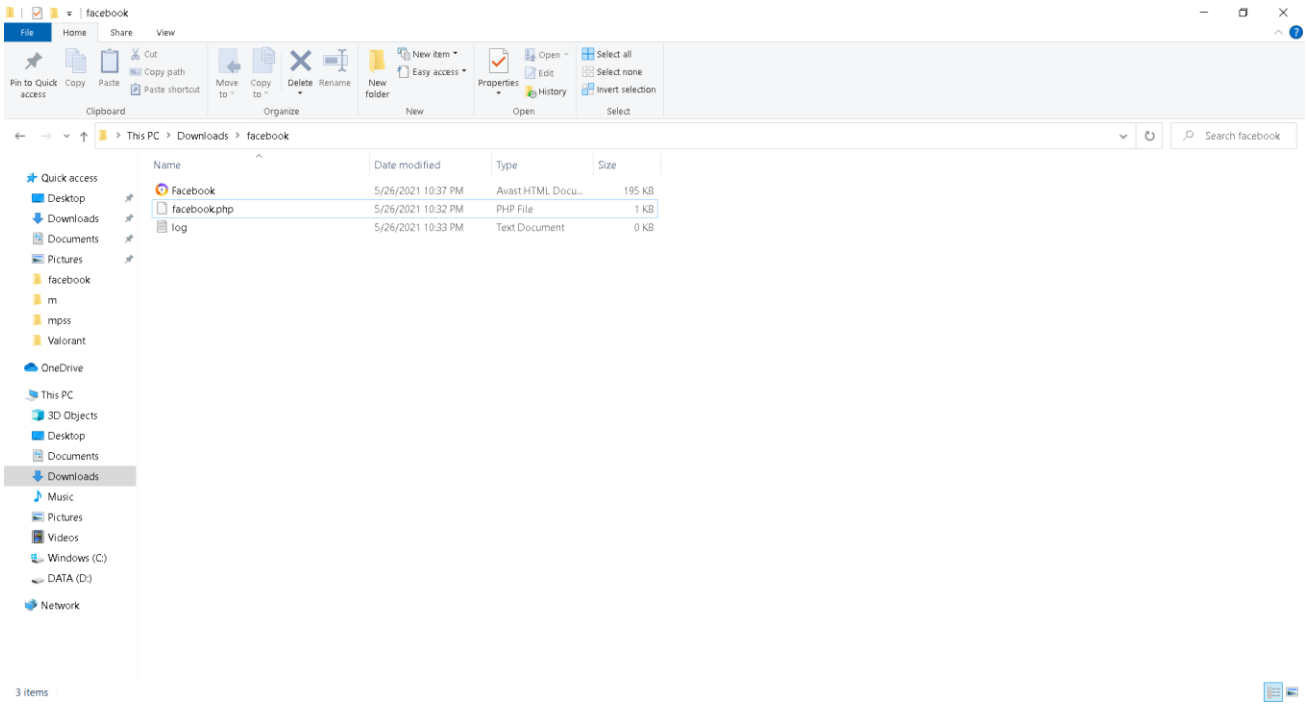
Step1:

We need 3 files for this

1) facebook html

2) php script

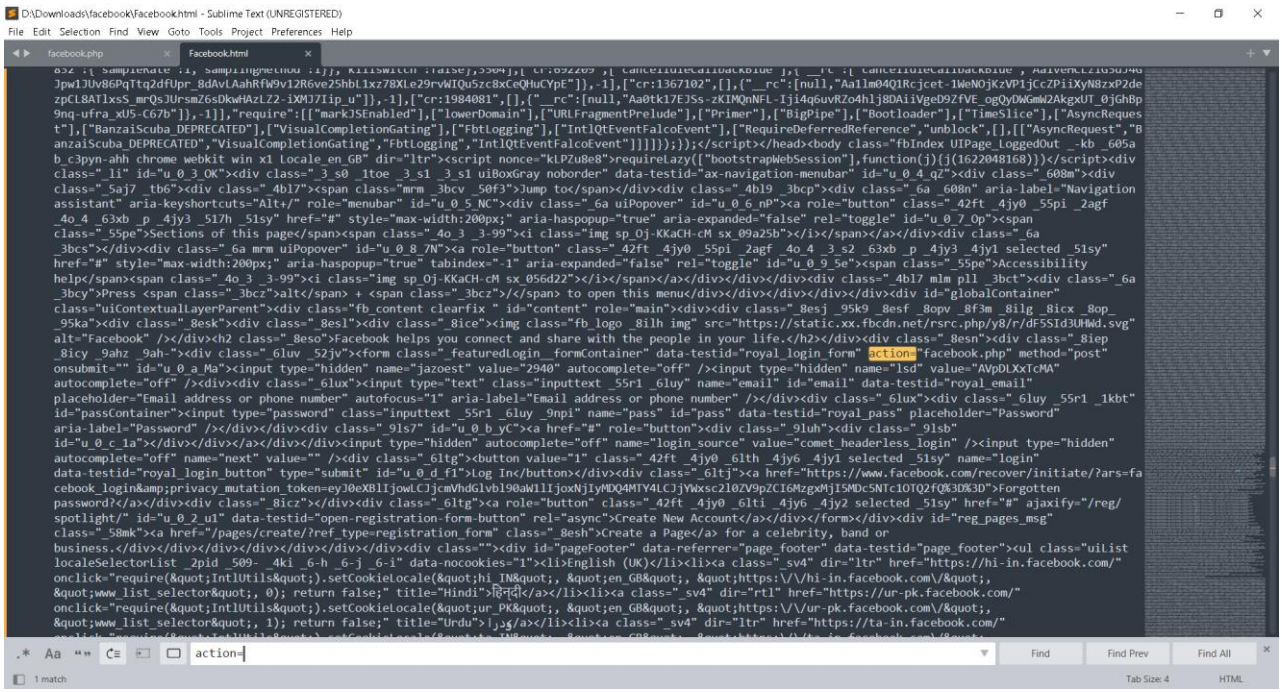
3)txt file



Step 2 :

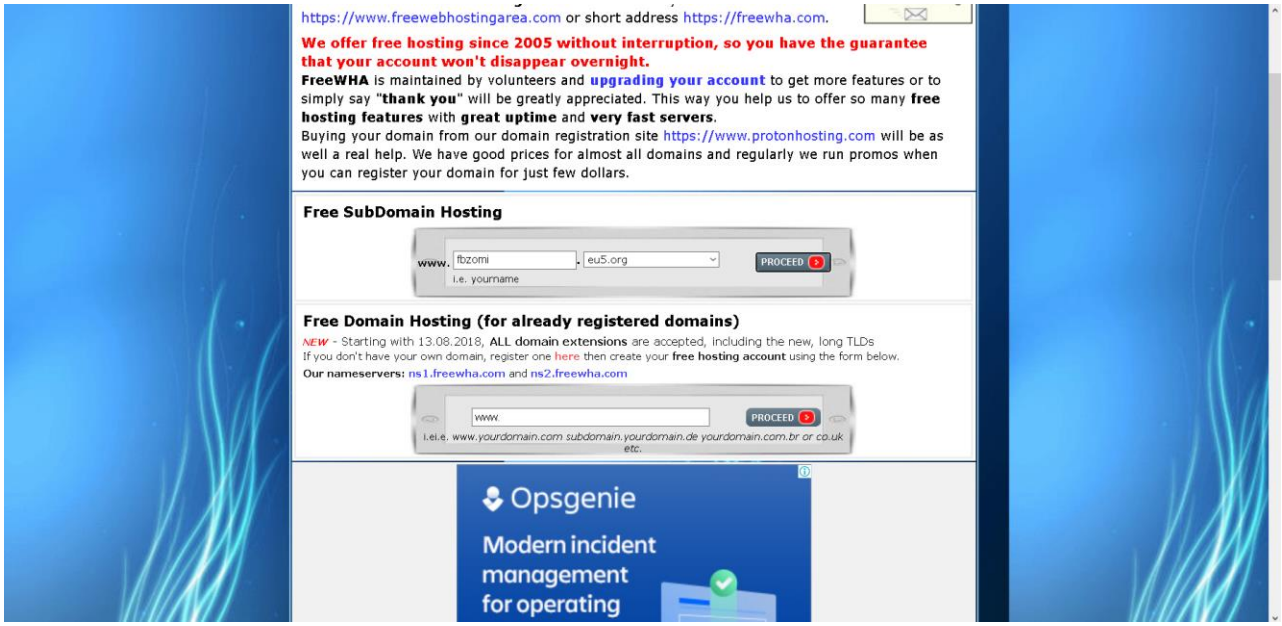
Now you need to open the html file in a txt editor and replace the actual link with the php file

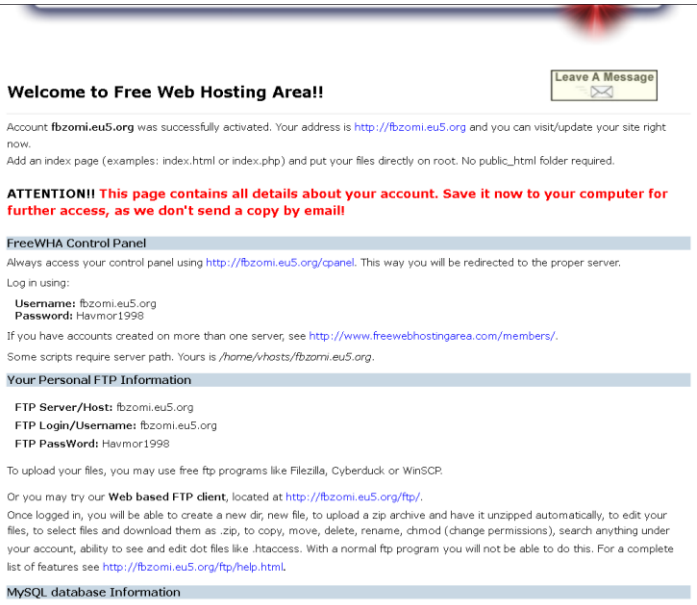
In this case we need to find “action=”



Step3 :

Now we need to visit freewha.com where we can host our website and host a free subdomain with eu5.org and create a acc





Welcome to Free Web Hosting Area!!

Leave A Message

Account **fbzomi.eu5.org** was successfully activated. Your address is http://fbzomi.eu5.org and you can visit/update your site right now.
Add an index page (examples: index.html or index.php) and put your files directly on root. No public_html folder required.

ATTENTION!! This page contains all details about your account. Save it now to your computer for further access, as we don't send a copy by email!

FreeWHA Control Panel

Always access your control panel using http://fbzomi.eu5.org/cpanel. This way you will be redirected to the proper server.

Log in using:

Username: fbzomi.eu5.org
Password: Havmor1998

If you have accounts created on more than one server, see http://www.freewebhostingarea.com/members/.

Some scripts require server path. Yours is */home/vhosts/fbzomi.eu5.org*.

Your Personal FTP Information

FTP Server/Host: fbzomi.eu5.org
FTP Login/Username: fbzomi.eu5.org
FTP PassWord: Havmor1998

To upload your files, you may use free ftp programs like Filezilla, Cyberduck or WinSCP.

Or you may try our **Web based FTP client**, located at http://fbzomi.eu5.org/ftp/.
Once logged in, you will be able to create a new dir, new file, to upload a zip archive and have it unzipped automatically, to edit your files, to select files and download them as .zip, to copy, move, delete, rename, chmod (change permissions), search anything under your account, ability to see and edit dot files like .htaccess. With a normal ftp program you will not be able to do this. For a complete list of features see http://fbzomi.eu5.org/ftp/help.html.

MySQL database Information

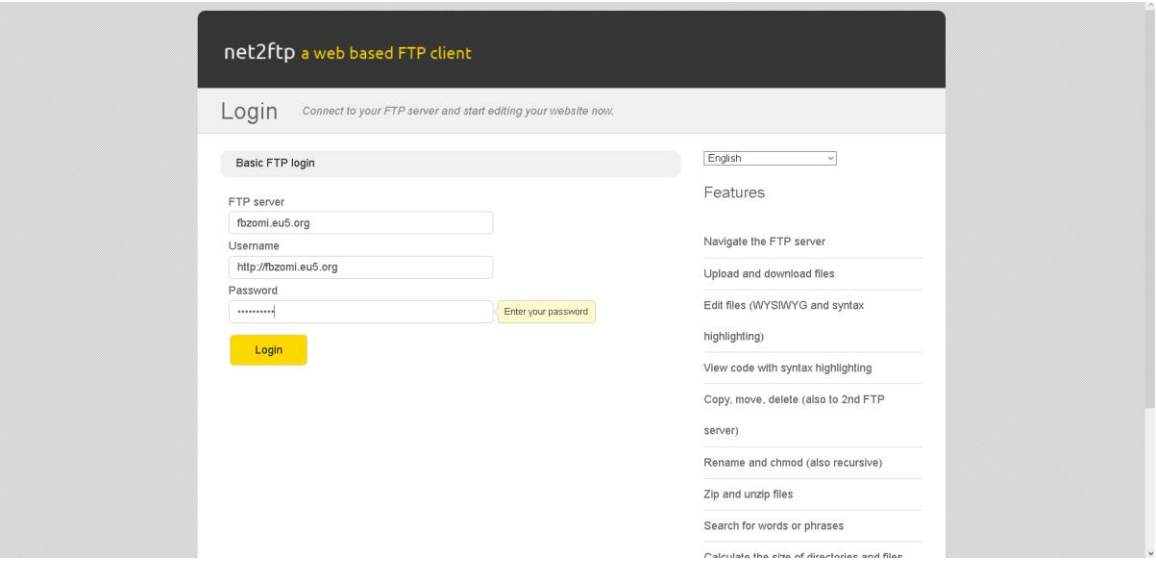
In the above screenshot you can see we got our subdomain link And open the link in a diff window

New Account, upload your files!
Valid indexes: index.php index.html index.htm index.shtml Index.htm Index.html INDEX.HTML INDEX.HTM default.htm default.html home.htm home.html Home.html Home.htm

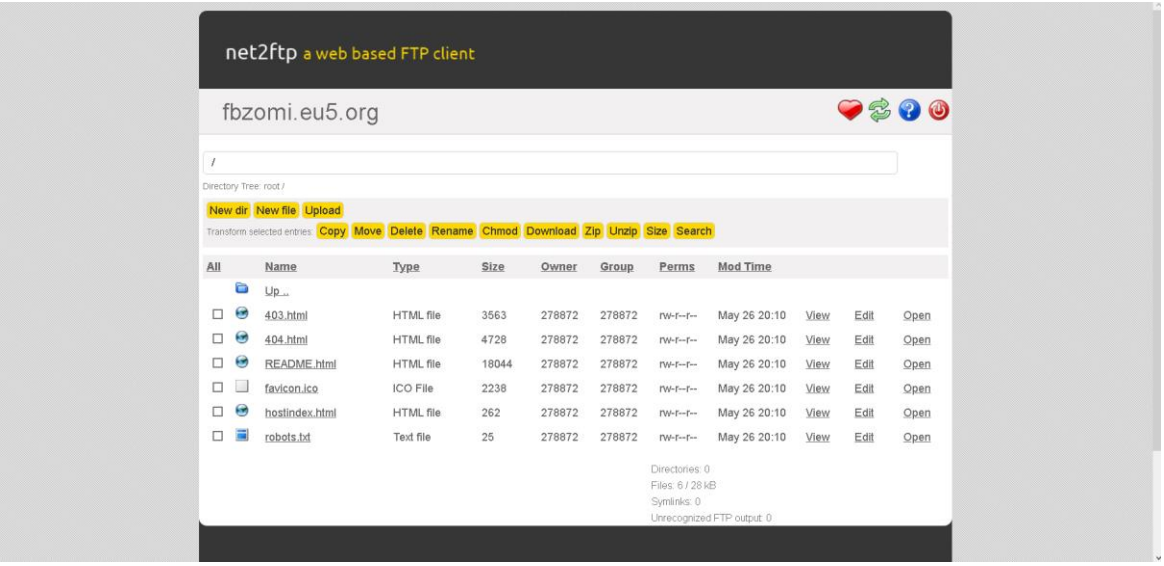
Attention! File name is case sensitive.

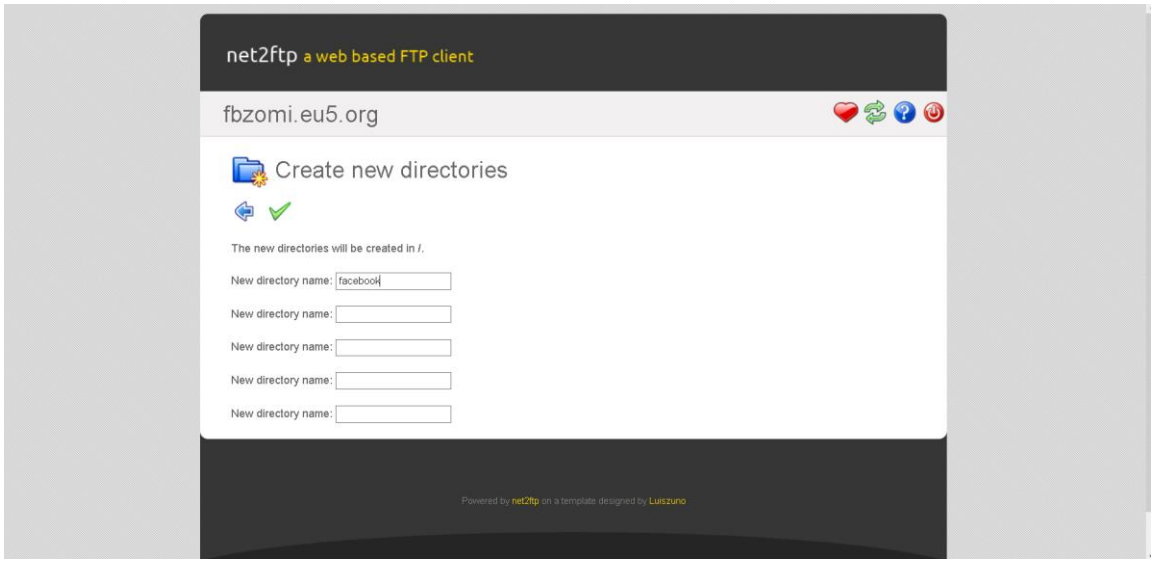
Step 4 :

Now open the FTP client and login with the username and password



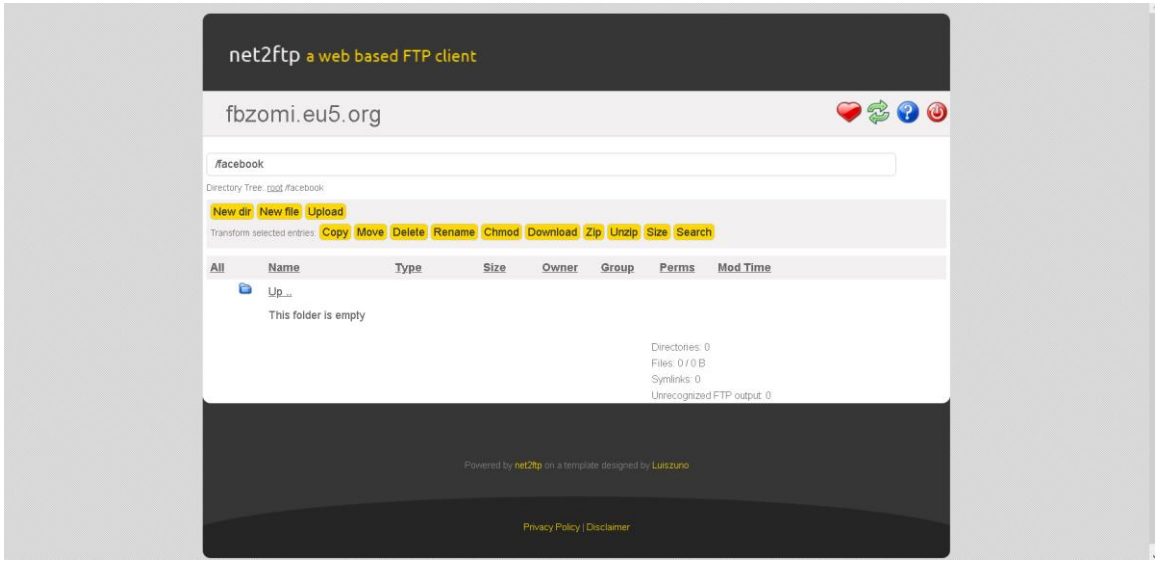
After login in we need to create a new directory to upload those three files

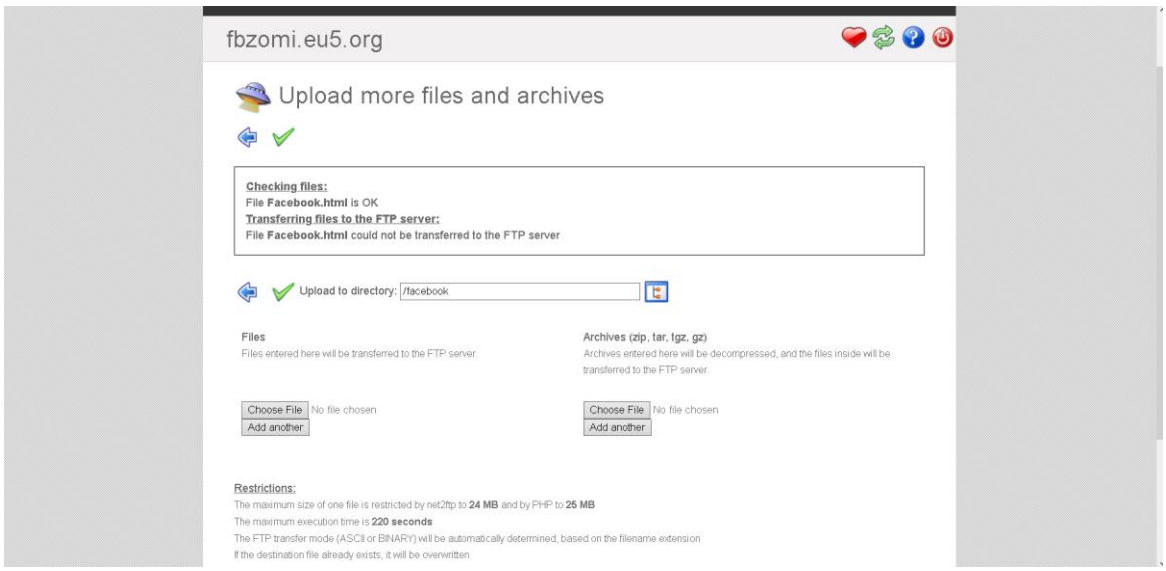


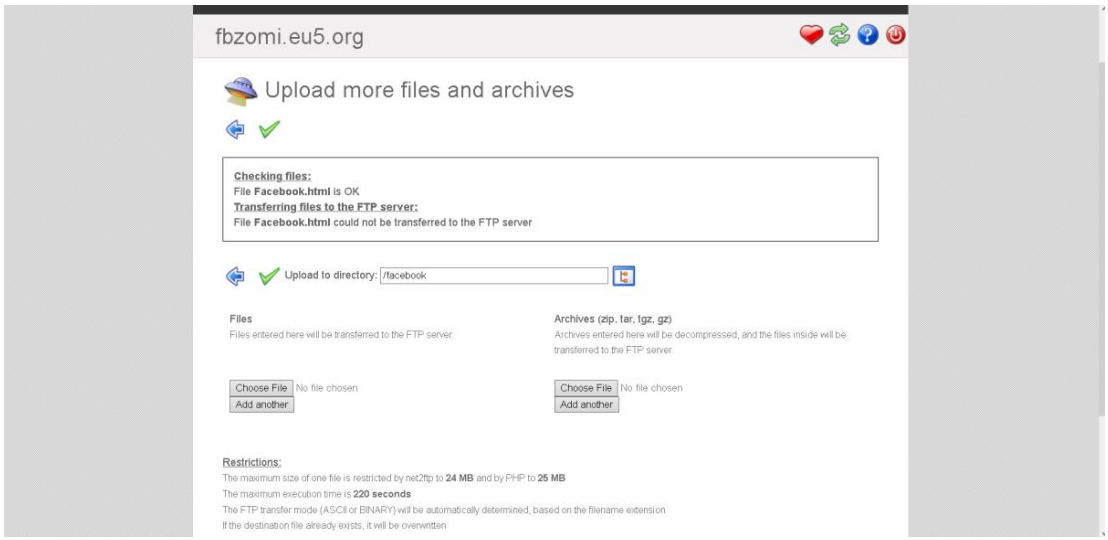


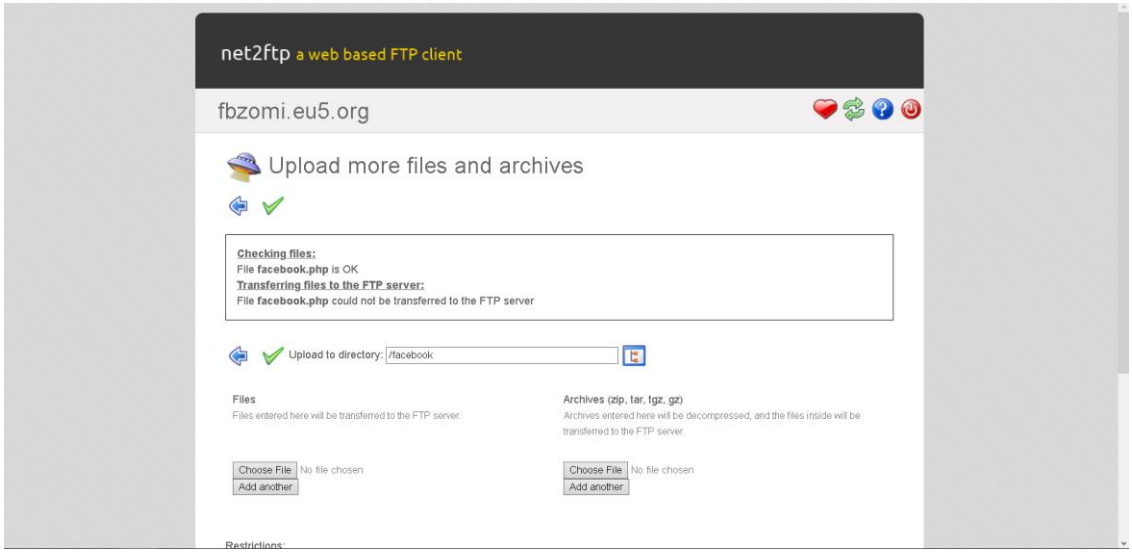
Step 5:

After creating a new directory upload those 3 files in the directory one by one



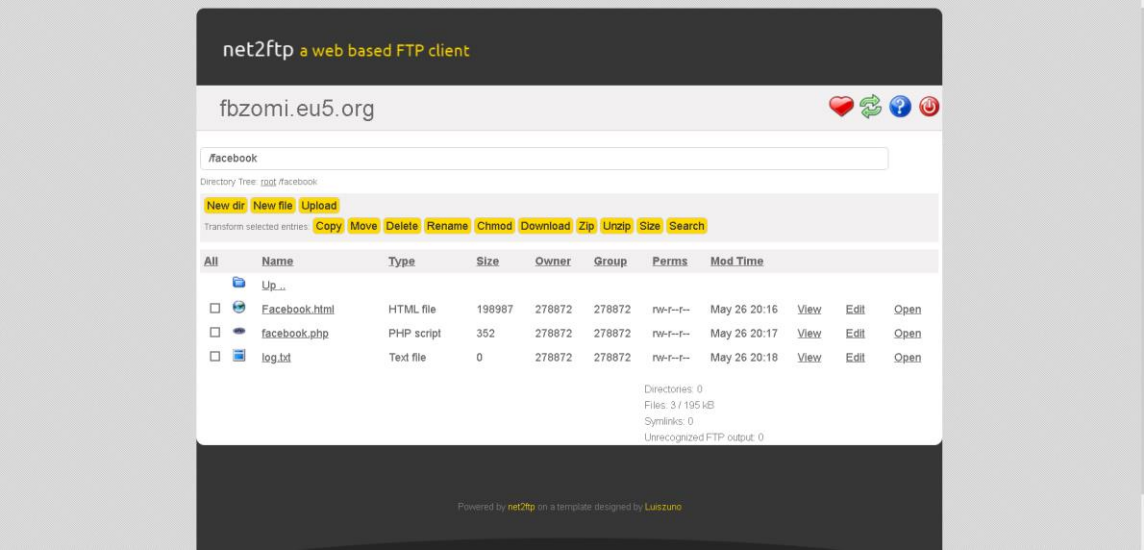




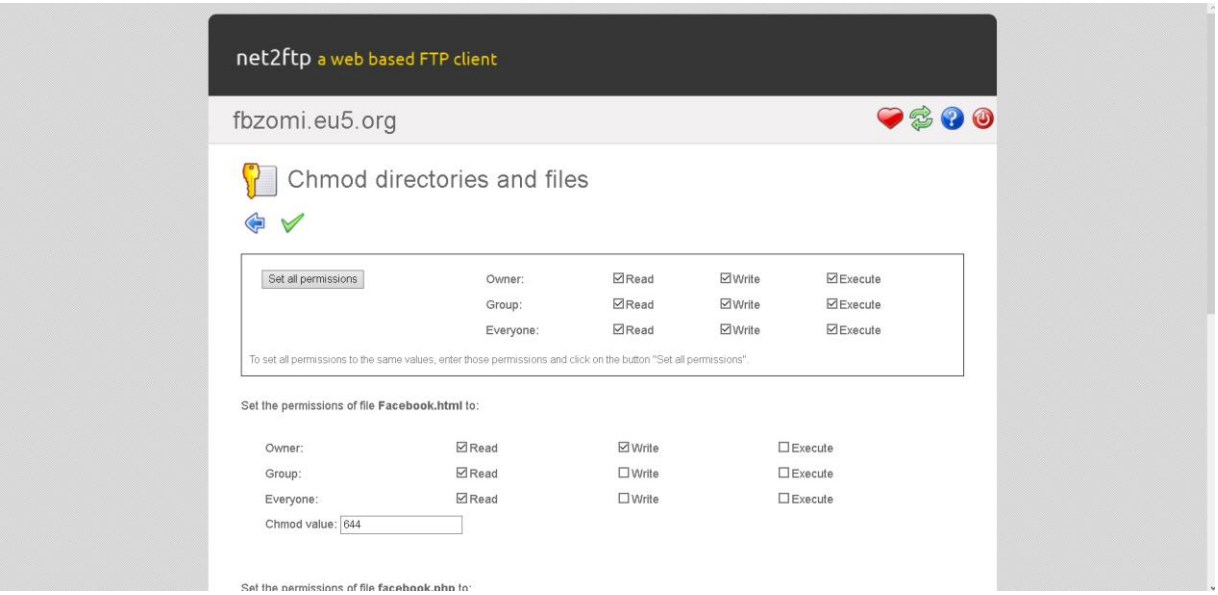


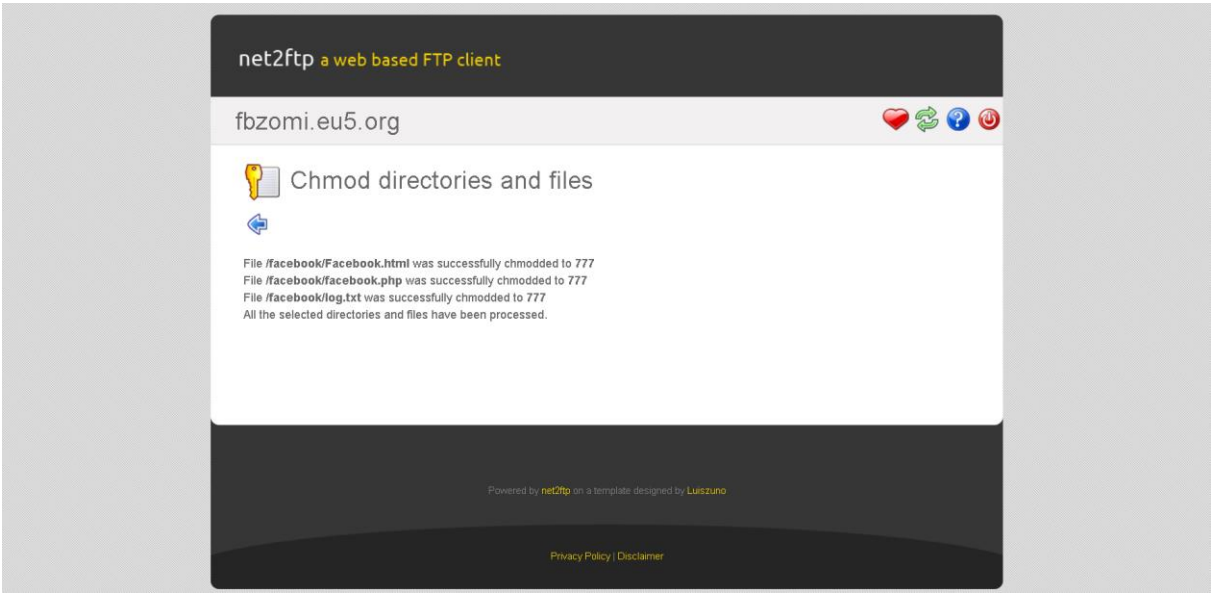
Step 6:

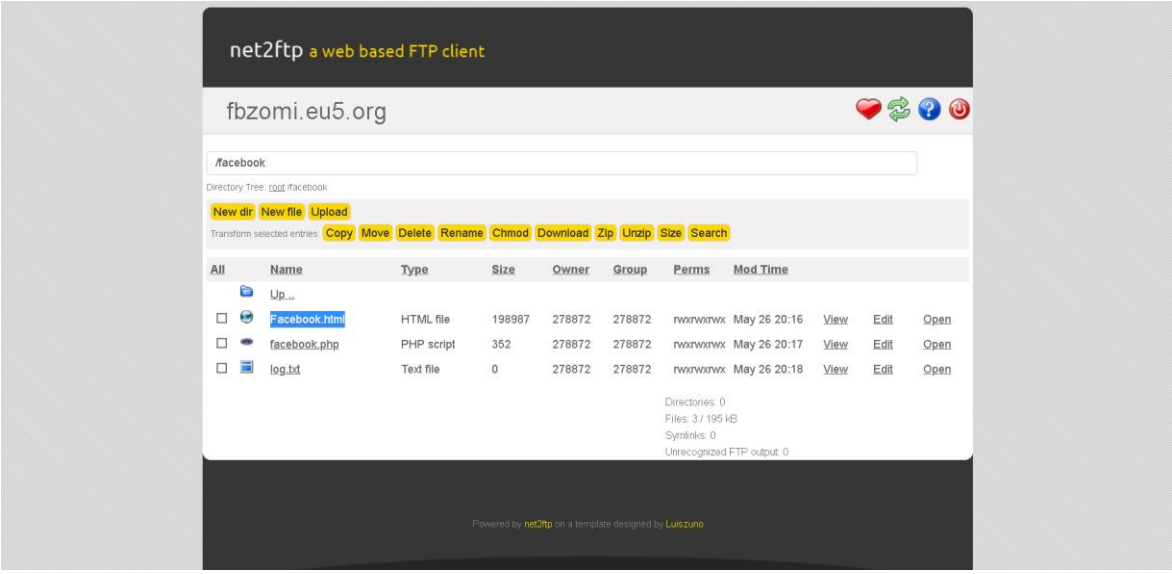
After uploading those files we need to change the permission to allow all



For that click on chmod and you will be directed to this page and give all the necessary permissions







Step 7 :

Now send the link to the victim and wait for him to login in to his/her facebook ID

facebook

Facebook helps you connect and share with the people in your life.

Email address or phone number

Log In

Forgotten password?

Create New Account

Create a Page for a celebrity, band or business.

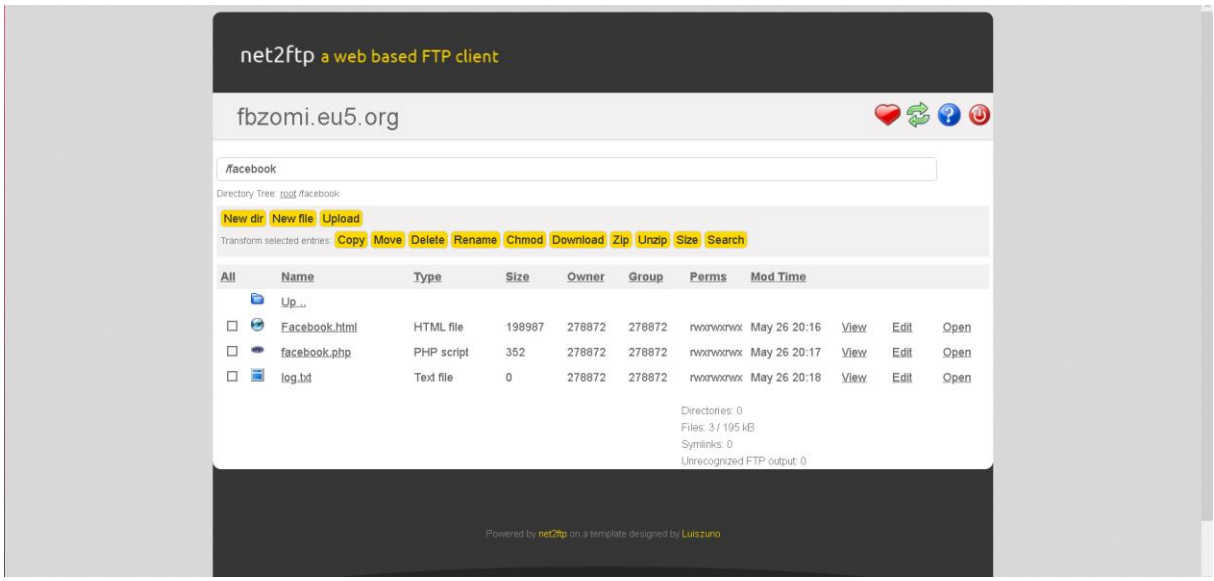
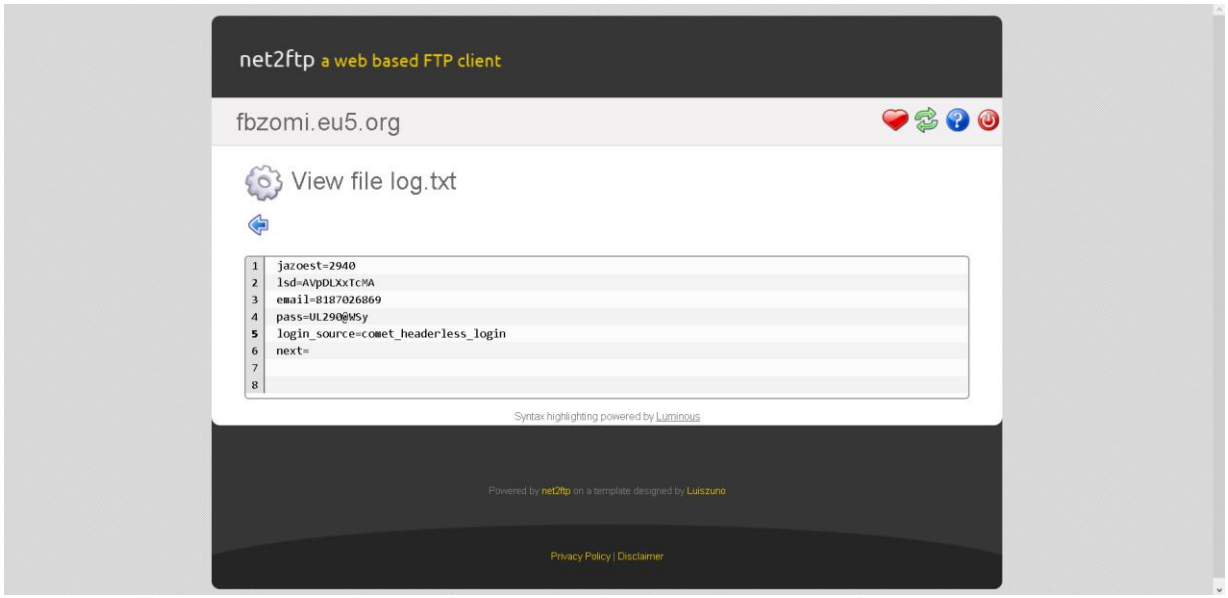
Step 8:

After the victim logins in his or her facebook account in the same line of txt file click on view



Now you can see the victims credentials



Countermeasures for phishing attacks:

1. **Filter emails for phishing threats**
2. **Update client-side operating systems, software, and plug-ins**
3. **Harden Your Clients**
4. **Block Internet-bound SMB and Kerberos traffic**
5. **Detect compromised credentials and lateral movement**
6. **Implement 2-factor authentication**
